OPIP OVERVIEW

Alternative fuels for automobiles are currently a topic of growing interest and importance. As we know, fossil fuel reserves are on the verge of running out and the exhaust they produce are extremely bad for the flora and fauna. Most of these alternative fuels are produced domestically, reducing our dependence on imported oil, and some are derived from renewable sources. Often, they produce less pollution than gasoline or diesel. Thus, they help us in improving environment, economy and energy independence.

Researchers strongly believe that using alternative fuel is a better way to achieve sustainable mobility as well as sustainable living. This oPIP will help you to understand everything about alternative fuelled vehicles, modifications required in the engine/vehicle to use alternative fuel, Government of India initiatives and the regulations & standards.
