

Background and Objectives

India's higher education system is one of the world's biggest, with more than 850 universities. The PhD is an advanced research qualification, designed for those who have already completed post graduation.

Doctor of Philosophy (PhD) is a recognised Doctoral academic degree awarded by universities, higher education institutions to applicant, who has submitted a thesis or dissertation on the basis of substantial and original work in their chosen field. The specificities of PhD degrees differ depending on where you are and what subject you are researching?

In order to understand the concept of PhD in detail, ARAI & MIT-WPU, Pune jointly invites you for a 2-day online Proficiency Improvement Programme (oPIP) on "How to get admission to PhD and complete successfully". This is the perfect programme to answer your questions if you are doing PhD or planning to do PhD.
