

oPIP OVERVIEW

7th – 8th Oct 2021

Latest emission regulations have reduced the mass of regulated emissions from the exhaust systems of the automobiles, and hence exhaust system manufacturers and vehicle manufacturers have been investing heavily in the R&D for technologically advanced engine/after treatment devices that comply with new guidelines. It is important to understand upcoming and latest trends in after treatment devices such as 3 way catalytic convertor, particulate filter and selective catalytic reduction (SCR), along with focus on next generation of after treatment devices.

ARAI Academy presents a very comprehensive online Proficiency Improvement Programme (oPIP) on “**Latest Trends in After Treatment Systems**” for students, faculty & working professionals. ARAI Academy also announces a FREE eLearning course (ePIP) on “**Selective Catalytic Reduction**”, especially for the participants of this Programme, with an aim to ensure maximum learning.
